

STUDY INFORMATION

The study will consist of two study parts:

- **Part 1:** In our clinic you will receive a single dose of nicotine gum and then blood samples will be collected through an intravenous (IV) line.
- **Part 2:** At home you will self-administer CA orally for 3 days. On the 4th day, in our clinic, you will receive a single dose of CA and nicotine gum, with blood samples collected through an intravenous (IV) line.

PARTICIPANT ELIGIBILITY

Eligibility requirements:

- Age 18-64 years old and healthy
- Not taking any medications, dietary/herbal supplements, or citrus juices that can interfere with your ability to eliminate study drugs
- Willing to abstain from consuming caffeinated and alcohol products the evening before and the morning of the first day of each study part
- If female, willing to use acceptable method of contraception that doesn't include oral contraceptive pills for the duration of the study and to continue for 3 weeks after the conclusion of participation
- No known allergies to over-the-counter nicotine gum, cinnamon products, and/or gelatin
